Mac OS 10.6 Snow Leopard Suite Installation Instructions

Please note that this document is a copy of the html document that is displayed by the installer. You must download the installer and use the html document displayed by the installer to complete installation and to download the additional files. This document is presented as a convenience to study the installation instructions before you actually download the product. The installer will copy up to three folders to your desktop,

depending on the products you selected. If you chose "Easy Install", all three folders will be copied. The folders on your desktop are one or more of the following: "OS 10.6 SnowLeopard", "iWork '09" and "iLife '09". In order to install each product additional downloads and steps are required. Please follow the detailed instructions below to complete installation of

installer will have active links): Snow Leopard Additional Files 1

each product.

Snow Leopard Additional Files 2 If you are using the Safari browser, the files will automatically be decompressed and two folders containing additional OS X 10.6 install files will be created in your "Downloads" folder.
